

In the Claims:

The claims are as follows:

1. (Original) A method of presenting a shopping summary associated with electronic commerce, comprising the acts of:

 detecting a right click of a computer mouse on a web page; and

 showing a shopping summary in response to detecting the right click.
2. (Original) The method of claim 1, wherein the act of showing further comprises the act of accessing a second web page that includes the shopping summary.
3. (Original) The method of claim 1, wherein the act of showing further comprises the act of opening a web page overlay that includes the shopping summary.
4. (Original) A method of presenting a shopping cart for on-line shopping, comprising the acts of:

 detecting a right click of a computer mouse on an on-line shopping web page; and

 showing a shopping cart responsive to detecting the right click of the computer mouse on the on-line shopping web page.
5. (Original) The method of claim 4, wherein the act of showing further comprises the act of accessing a second web page that includes the shopping cart.

6. (Original) The method of claim 4, wherein the act of showing further comprises the act of opening a web page overlay that includes the shopping cart.
7. (Original) A method of displaying a bidding summary for an on-line auction, comprising the acts of:
- detecting a right click of a computer mouse on an on-line auction web page; and
 - showing a bidding summary responsive to detecting the right click of the computer mouse on the on-line auction web page.
8. (Original) The method of claim 7, wherein the act of showing further comprises the act of accessing a second web page that includes the bidding summary.
9. (Original) The method of claim 7, wherein the act of showing further comprises the act of opening an overlay that includes the bidding summary.
10. (Original) A method of presenting a shopping summary for electronic commerce, comprising the acts of:
- detecting a right click of a computer mouse on a web page;
 - deriving a screen location from screen coordinates of the computer mouse;
 - creating an overlay that includes a shopping summary; and
 - showing the overlay upon the web page at the derived location.

11. (Original) The method of claim 10, wherein the shopping summary includes a shopping cart.

12. (Original) The method of claim 10, wherein the shopping summary includes an auction-bid summary.

13. (Original) The method of claim 10, wherein the shopping summary includes a barter summary.

14. (Original) The method of claim 10, wherein the shopping summary includes a rental summary.

15. (Original) A method for presenting a shopping summary for electronic commerce, comprising the acts of:

detecting a right click of a computer mouse on an electronic commerce web page;

when the right click is detected, determining whether a shopping summary is shown;

if the shopping summary is shown upon detection of the right click, retiring the shopping summary; and

if the shopping summary is not shown upon detection of the right click, showing the shopping summary.

16. (Original) The method of claim 15, wherein the shopping summary is included in a second web page.

17. (Original) The method of claim 15, wherein the shopping summary is included in an overlay upon the electronic commerce web page.

18. (Original) The method of claim 15, wherein the shopping summary includes a shopping cart.

19. (Original) The method of claim 15, wherein the shopping summary includes an auction-bid summary.

20. (Original) The method of claim 15, wherein the shopping summary includes a barter summary.

21. (Original) The method of claim 15, wherein the shopping summary includes a rental summary.
